VOL. 1. NO. 44.

LOMOND, ALBERTA, FRIDAY, JUNE 8, 1917.

\$1.00 PER YEAR.

## LOCALETS :

Born—At Calgary on Saturday, June 2nd., to Mr. and Mrs. L. M. Swain, of Lomond, a seven and a half pound boy.

Dr. L. W. Walkey has purchased a D. 35 McLaughlin car from the local agent, Chas. Adams.

R. R. Saunders is turning into a horticulturalist, since having his house painted up, he has set out numerous shade trees to be and generally set things to rights around his premises.

Mr. and Mrs. Roscoe Chevrolet, of Vulcan, were Lomond callers Monday.

C. Christiansen departed on Wednesday morning train for Strathmore where he intends spending a short time on business.

Bill Cox left Wednesday morning via the "Honeymoon Special" for Enchant to be the door-keeper in the station at that point, the regular agent being laid up with a broken collar bone.

A good deal of work around Lomond is being held up through the lack of laboring men.

Big doings at Midway school house-to-night.

Mr. and Mrs. Gordon Varcoe are spending the week-end in Lethbridge.

Thos. Farrand, recently of Vulcan, has been engaged by Marshall & Wilson as clerk in the "Quality Store."

Mr. and Mrs. H. W. Reeves, Mr. and Mrs. Wm. Grant and daughter, and F. M. Anderson, motored over from Vulcan on Sunday to call on the editor and household—unfortunately finding them not at home.

A. Parker ships hogs June 12th.

Delaney & Armstrong are erecting a new office and display room on the front of their machinery building.

W. A. Teskey reports the sales of seven cars for the past week to the following: Chas. Dalton, P. Branden, J. W. Cochran, Mr. Sudden, P. J. McCann, Geo. Graham and John Ward. This makes a total of seventy-three deliveries from the Lomond Ford Garage since the middle of last September.

Admiralty reports of submarine losses would lead one to believe that the submarine menace is being mastered by the British navy. A noticeable falling off in victims is being reported weekly.

The Vulcan Advocate is having a new building erected for its accommodation.

The Bassano Mail has a new editor, in the person of E. G. Allen.

The British forces in France have commenced another strong offensive near Ypres, with the town of Lille as their apparent objective.

## THE ELECTION

Latest information would lead us to believe that the Sifton Government was returned to power with a strong majority as previous.

In our own constituency, as was expected, Mr. McNaughton obtained a decided victory. Lomond poll gave him 37 to 2, fourteen ladies voting.

Archie McLean was returned in Taber constituency.

E. F. Purcell, president of Purcell's Limited, of Travers, defeated Hon. C. R. Mitchell in Bow Valley constituency.

Mrs. McKinney, independent, of of Clareholm, was elected by a 250 majority.

Mr. McNaughton and Mr. Mitchell addressed a meeting in Lomond a week ago to-night. Being advertised but a few days and coming in a busy season not many from the country were able to attend. A good attendance of town people turned out and gave the gentlemen an attentive hearing.

The refusal of Sir Wilfred Laurier to accept to coalition government scheme offered by Premier Borden is expected to precipitate a general election in Canada. If an election is called the Borden government will appeal to the country on the strength of the conscription bill.

**Rev. W. H. Irwin for Lomond**  
Lomond circuit's new pastor will be Rev. W. H. Irwin, of Edson. Mr. Irwin is a married man with two children. Mr. Irwin has the reputation of being a very capable man and the circuit is fortunate in having him assigned to this point.

## The Torpedo

When a German U-boat sends a torpedo on its mission of destruction it is utilizing a weapon of British origin, since the modern locomotive torpedo was the invention of Whitehead, a British engineer. It was in 1877, forty years ago, that the Whitehead torpedo first came into notice. Whitehead's original torpedo carried twenty-six pounds of gun-cotton and travelled eighteen knots. The twenty-one-inch Whitehead torpedo now in use carries 330 pounds of gun-cotton and has a range of over six miles, at a speed of thirty knots. At a range of four miles its speed is about forty-five knots. The explosive is packed in the head of the torpedo, and is usually gun-cotton, although the Germans use what they call trinitrotoluene. The explosion is caused by a steel rod which projects a few inches beyond the head of the missile. When this rod or striker comes in contact with an unyielding substance, such as a ship's side, it is pressed back against the detonator, and woosh!

Miss MacDugald has taken a position as assistant in Parker's store.

## TRAVERS :

Ladies Aid met Wednesday with Mrs. Hooker a large crowd being present also a number from the Lomond Aid which we are always glad to welcome not much work was accomplished as Mr. Mitchell and Mr. Sparcklin took the afternoon in demonstrating and serving pancakes baked on Aluminum ware. A little contest was prepared and Mrs. Hunter, president of the aid, was wise enough to capture the prize.

Mr. Keating has taken over the International Harvesters business here from Mr. Best. Mr. Keating is not a new man at this work, neither does he need an introduction to the public as he was one of the homesteader boys and is a wide awake salesman.

Another Sunday game was tried out on Enchant diamond with Travers as a little in the lead, the score being 11-17.

The Bray Hardware building is receiving an outside coat of paint.

Mr. Tainter and Mr. McLean were in town on Tuesday.

Miss Lyeeing has severed her connection with the telephone office and gone home. Mr. Ulrick has been very fortunate in securing a Mr. Bennett, of Champion, who will act as "hello girl" and book-keeper.

Roy Paulson is sporting a new Gray Dord which he purchased through "Duke" Armstrong, the local agent, at Lomond.

Miss Elva Greenman is visiting in town for a few days with her sister Mrs. G. McCann.

Mr. Wright, of the local store, has returned from a three weeks trip to Vancouver, he came up the street with a real "city air" after alighting from the "flyer."

Mr. Wallace brought home with him from Calgary, a new Saxon car as a momento of his trip. Mr. Cochrans has also purchased a new Ford this week.

Mr. Geo. Whitting has a sister visiting him whose home is near Okotoks.

Mr. Buchan's new dwelling is nearing completion as it is ready for the plasterers.

Mrs. A. Clark was taken sick Wednesday morning with an attack of appendicitis. She was to have left for a visit to the States the same morning but will be delayed for a week or so.

Miss Koch attended the ball game on Sunday at Enchant.

Tractor engines are still being unloaded and sold out as fast as they come in and are proving a great success.

Mr. and Mrs. H. Ulrich were Leth-

## BASE BALL

The game in Champion yesterday afternoon, postponed till evening on account of the rain and hail storm ended in the ninth inning in a score of 3 to 3, Champion disputing a decision and the umpire calling all bets off. The boys are lining fairly good just now and expect to make a reputation for themselves before the season closes.

## Wheat Market Firm

The market has been holding firm all week at \$2.15 on the street in Lomond.

## A Genius in our Midst

Robt. Moir, the ever genial manager of the Alberta Pacific Elevator at Lomond, has received letters patent on an invention of his own which will reduce the efforts of his fellow elevator men in the matter of loading cars. The device manipulates the spout inside the car and does away with the shoveling back process. Bob has given the Calgary Iron Works the right to manufacture and reports several hundred sales. Bob's royalties are piling up and he expects to be sporting an automobile as soon as gasoline gets a little more plentiful.

bridge visitors Saturday returning Sunday.

Among the Calgary visitors this week are Mr. and Mrs. Wallace and Mrs. St. John who is visiting her mother there.

At the ladies Aid on Wednesday it was voted to apply another one hundred dollars from the aid fund toward the new church, subscriptions have been turning in freely the past few weeks and we expect to see a commencement for the new church made in a few days.

The ladies are pouring in to vote today from country and town but it is an awfull tragedy to have to keep mum and not tell which way they are voting.

Mr. and Mrs. Best have been to Retlaw the past two days looking after their land interests.

Mr. and Mrs. Charley Barnett have received news that their son Pte. F. C. Barnett has been missing since May 3rd which is a terrible suspense to the family who have the sympathy of all their friends.

Well the game is over, best game played on the diamond this year. Taber won 7 to 4 and are a fine bunch with Enchant players mixed in, the game was called off till after five on account of the rain. Travers pitcher was all in and out from his little trip so had to use any of the team for pitcher and didn't expect to shut Taber out so good. Taber, come again you're all right.

### Hope It Comes True

The war will end on August 28 of this year and Germany will be crushed by the Italians, according to a prophecy attributed to St. Malachie, made in the twelfth century, unearthed by the Director of the Civil Museum at Como and published in the *Petit Journal*, Paris.

Malachie, the accuracy of whose predictions regarding the line of Popes three centuries after his own era is celebrated, begins by specifying, in somewhat mysterious language, the exact date—August 28, 1616—on which “new races, taking their name from Romulus”—which must mean the Roumanians, would enter the war.

“Then,” the prophecy is said to continue, “the ferocious beast which for two years and one month had covered the earth with blood, horror and carnage, will be enveloped on every side, and striking out vainly the while, will seek whom it can devour, but will never find him.

“There will be great battles during thirteen months. The fifth day after the sun comes out from the sign of the lion, the beast will die a very bad death.”

Including the moon which was new the day Roumania entered the war, the thirteen new moon would rise on August 17 next and vanish again on September 16, and on August 23 there is to be a curious constellation of stars

in the heavens and on the 28th the Germans will throw up their hands!

### World's Food Crop Low

The world's food crop is deficient and the situation is becoming alarming, according to David Lubin, American representative of the International Institute of Agriculture. Mr. Lubin is urging the imperative necessity of mobilizing of American agriculture resources. To a correspondent of the Associated Press Mr. Lubin said:

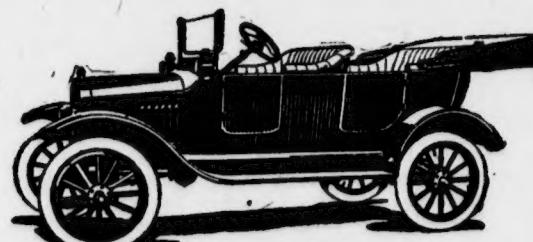

“For the first time in many years there exists a deficit in the supply of corn, wheat, rye, barley and oats, estimated at a total of 130,000,000 bushels less than the normal requirements for countries open to trade. The situation is worse than was expected last October. The institute's reports indicated then a surplus of more than enough to feed the world until August of this year, when the new crop begins to come in.

“We must profit by Europe's experience before meal tickets become necessary. We can avoid high prices by the eliminating of waste, by the growing of more food and also by effective organization of our food supply, which is more important than getting men into the army.

“Two months after the beginning of the war Germany forbade the use of wheat or rye for feeding livestock, and two months later requisitioned all supplies of food. Our first duty is to prevent the manipulation of food supplies thus obtaining an effective mobilization through the same plan as the Germans, the substance of which is embodied in senate bill 5973.”

### FOR SALE

“MADE IN CANADA”

### The 1917 Ford Touring Car

\$555.00

At my Garage in Lomond.

Buying a Ford is a business proposition.

Did you ever notice that fully ninety-nine per cent. of the commercial travellers covering Southern Alberta by motor use the Ford Car? Do you know the WHY? It is because they stand the use and abuse on the country trail at a minimum expense. What it does for them it will do for you.

## Lomond District

The grain has passed all records this week for growth. As the sun shines down upon the grain, the farmer smiles as he looks ahead to the time when he can look the whole world in the face for he will owe no man.

Mrs. H. McIntosh and son Kenneth were Sunday visitors at the home of Mr. and Mrs. Munroe.

The Misses Edith Clanfield and Beatrice Joel were visitors at the Elliot home last Sunday.

Farmers drawing coal from the Bow City mine Monday, say that they were nearly swamped in the river. The water in some instances came up to the drivers' feet.

Bob Thompson and hired man are working with full steam ahead clearing the formers' pre-emption. He intends engaging a ploughing outfit to break one hundred acres.

Adolph Blank and help are breaking up the half section which he bought last year, being part of the school section east of town. He has 695 acres of grain in this spring and about 100 acres to summer follow. Men like Adolph are making this district famous as a wheat producing country.

### NOTICE

As requested by the business people of Lomond through a petition, the Council has passed a By-Law causing all places of business to be closed every Thursday afternoon from May 31st to August 30th inclusive. All encroachments will be prosecuted according to law. All stores and places of business will close at 1 o'clock p.m. sharp.  
By Order.

Successor to R. R. Saunders  
CHEMIST - DRUGGIST

The modern farm requires expensive buildings. In a few years these rapidly deteriorate unless protected by good paint.

## **SHERWIN-WILLIAMS** PAINTS AND VARNISHES FOR FARM USE

No farm owner can afford to leave his farm buildings unpainted. When new they appear to stand the weather alright, but surely and gradually the lumber begins to crack and check, decay starts, and before you realize it you have a leaky, draughty barn, and expensive repairs are necessary.

The regular use of paint means a small outlay occasionally, but it keeps your buildings as good as new.

S-W Barn Red is a special paint for painting farm buildings. It is economical in price and it gives good service. It is one of the full line of Sherwin-Williams Paints and Varnishes which we carry in stock.

**Strong Directorate. Skilled Management. No Promotion Stock. No Bonus Stock. No Holding Company to Juggle the Stock  
All Stock \$100 per Share.**

The Stock of the Alberta Flour Mills, Limited, is offered to the people of Alberta mainly as an attractive investment, an investment for individual gain and good return on your money.

Mining in Canada is profitable, as shown by the annual statement of the leading companies, and profitable can only be realized by an analysis of the annual statements which will show how much of securities issued actual money paid in and how much is bonus stock and promotion stock, and how much is stock issued in the way of dividends. All this kind of stock participation in the dividends, though it represents only one dollar paid in.

This point brought out, not as a criticism of these companies, but to bring home to the people of Alberta the exceptional value of an investment in the shares of a company organized on a different basis—no lease—no bonus, no promotion stock, all stock \$100.00 per share, paid up fully, by directors, officers and all who may hold the stock.

If milling companies under such basis of financial organization as noted above, with their various plants widely scattered, thus tending to an enormous overhead expense of management, can show, even under the conditions as they are now considered, such handsome financial returns, what can you but think of an investment in shares of a company whose plant is most modern, in plant and equipment, most complete in all details for economy of operation, located at a commanding point like Calgary, accessible to first choice of the wheat, with transportation facilities of the best, with power costs low, and the best of all, whose securities represent only actual money paid in to provide for cost of plant and operating wage.

The benefits to Alberta of a large milling plant at Calgary, outside the financial one are plain to all. Alberta now gets the profits of raising the wheat, and should have the profits of its manufacture as well.

### Fiscal Agency

The Western Agencies and Development Company, Limited, are the Fiscal Agents of the Alberta Flour Mills Limited for the issue of 25000 shares of the Capital Stock (par value \$100 per share) for the purpose of building an up-to-date milling plant at Calgary.

This project has been scrutinized by the Fiscal Agents both as to its intrinsic soundness and the fairness of its flotation. We confidently recommend the purchase of this stock to the investing public.

Western Agencies & Development Co., Ltd.  
423 Lougheed Building  
Calgary, Alta.

Is the industry logically located? Is Calgary the logical milling centre for Alberta?

Quantity and quality of the raw material? Accessibility of raw material to the mills? Can it be manufactured as cheaply as at other centers which are making a success of manufacturing the same product? Transportation to markets for finished products and the management of the enterprise?

#### Quantity.

Alberta produced in 1915 and in 1916 approximately 100,000,000 bushels of wheat. Less than 10% was milled within the province!!!

#### Quality.

Chemical analysis has proved that there is no wheat raised on the American Continent superior to Alberta wheat for flour volume and flour quality.

#### Accessibility

Calgary is the chief distributing point between Winnipeg and the Pacific Coast. A network of roads and railroads from the grain areas and the supply of cars available for local movement of wheat make Calgary an ideal spot.

#### Cost of

It has been able demonstrated that wheat can be milled at Calgary not only as cheap but cheaper than at other milling centers.

#### Trans. to

Calgary within milling-in-transit privilege, with its railway lines radiating in every direction has the advantage for rapid shipment to every market.

#### Management

Men who have spent their life time learning the business in that great competitive milling center, Minneapolis.

#### Is flour

milling profitable

1. A positive investment to you in annual dividends and the increase in the value of the stock.
2. A nearby market to which to ship your grain.
3. More com positive buyers for your wheat.
4. Quicker returns on your shipments and doing away with storage charges and interest charges on advances.
5. A supply of millfeed for your live stock.
6. In a word it puts you on an equal basis with the wheat raiser of Minnesota and the Dakotas who market and sells his wheat any day in the year he sees fit and when he thinks the price is right. He has a shipping point and a milling point also, for his wheat.

Let Your MONEY WORK for YOU. KEEP the PROFITS of MILLING Your WHEAT in Alberta

### Amethyst Locals

Edd Welck is sporting a new Ford car.

Mr. Wm. Hill has bought north east quarter section of the Hudson Bay just south of the store.

Mr. Cliff Tucher has rented Mrs. Arthur Stanley's half section of five years.

Mr. and Mrs. L. C. Somerville, Mrs. Stiebritz and daughter Vandle were Sunday visitors at Mr. and Mrs. Seth Somervilles.

Archie Smith is busy these days fencing in his preemption. He expects to raise flax by the car load lots this year.

Mr. A. L. Gould, Mr. Dell Somerville, Mr. C. Williams, Mr. Glen Armstrong and Harry and John Hoppy went to Gleichen to buy land on the Indian reservation.

Mrs. L. C. Somerville has very sore eyes and do not seem to improve.

Mr. Emry Davis was a Calgary visitor last week.

Mrs. Annie Armstrong and Mr. Dell Somerville were Bassano business visitors last Friday.

Mr. and Mrs. Seth Somerville went to Bassano the first part of the week.

Mr. and Mrs. Jay Beagle has moved up west near his brothers Jack.

Mr. Clarence Royer also owns a car, it seems as if the auto bug is buzzing around quite busy lately.

Mr. and Mrs. Gould had quite a gathering at their home on Sunday.

Callers at Mrs. Edd Tuckers on Saturday were Mrs. Gould and children, Mrs. Sidney Tucker and daughter Verl, Mr. and Mrs. L. C. Somerville and Mrs. Stiebritz and daughter Vandle.

Dave Curry has filed on what was the Sly homestead just lately, it seems that homesteads now days are right in the midst of our homes.

### Binder Twine Outlook

Interesting statistics in regard to what may be expected in the binder twine market during the coming year are given in a letter which the Saskatoon Board of Trade has received from L. H. Dewey, botanist in charge of fibre investigations for the United States department of agriculture at Washington.

Mr. Dewey, who has just returned from an extensive investigation trip to Porto Rico writes to commissioner Sclanders:

"So far as I have been able to learn, there seems likely to be a sufficient supply of binder twine for all needs, but owing to the high price of fibre the price of binder twine are likely to be much greater than last

### LOST

year. Two or three of the prison binder-twine plants have quoted prices for the coming year at 13 to 14 cents per pound, with discounts for large quantities and for prompt payment.

"The quantity of henequen imported during the calendar year 1916 is reported to be 221,126 tons, which may be compared with 183,542 tons during the calendar year 1915. The importations for 1916 were the largest on record. It appears like a commercial paradox to have binder twine quoted at a price 2 to 3 cents per pound less than the current quotations for raw fibre. Much of the fibre, however, used in the twine for the coming season was purchased in the previous year at lower prices, but, of course, it is argued that if farmers receive a higher price for wheat, amounting to \$10 or more per acre above what they received in former years, they can afford to pay the 10 to 15 cents more per acre for the higher cost of binder twine.

"The people on that farm are very hospitable. They will take anybody in." "I know they will. We boarded with them last summer."

## Human Chemical Factory

The latest research proves that 1,200 eggs hold all the chemical elements contained in a man weighing 150 pounds. This does not mean that if you make an enormous omelet of these 1,200 eggs a man would be produced. It does signify, however, that the elements in the eggs would be equal to the elements in a man.

If a person were to eat nothing but eggs he would get just the chemicals needed for supporting life, but the system would not digest an exclusive diet like this. The person trying to live on eggs alone would soon sicken, and if the diet were not changed, would die.

If an average man, weighing 150 pounds, were reduced to a fluid he would yield 3,630 cubic feet of illuminating gas and hydrogen, or enough to fill a balloon that would carry 155 pounds.

If the nominal body were taken just as it is and all of the elements extracted from it there would be found enough iron to make seven large nails; enough fat for fourteen pound candles; enough carbon to make lead in 65 gross of pencils, and phosphorous enough to tip 820,000 matches. Besides all this would be found 20 teaspoons of salt, 50 full-sized lumps of sugar and 28 quarts of water.

Thus it is evident that a human being is a great chemical factory, and the value of a man in actual materials is considerable.

The 100 dozen eggs would yield precisely the same qualities of these chemical elements, and even at the present high rate of eggs most of us would rather have the eggs used for the purpose than the man.

## To Bore for Potash

Drilling for potash will be undertaken in northern Alberta during the coming summer by interests representing Baron Rhonda of Cardiff, Wales. It has been announced at Edmonton that work will be commenced at the salt beds on the Salt River, near Fort Smith. A rotary drill will be employed in the operations, and a definite attempt will be made to ascertain whether or not potash exists in sufficient quantities to warrant the beginning of a mine industry. The

salt measures will be bored through, and it is believed that at a workable depth below them the potash will be struck, as the geological formation of the district is of the kind that is found in potash belts.

The Prussian ministry of finance has under consideration the levying of a bachelors' tax, and may further conclude to assess unmarried women.
